06/03/2025

Overview of the waste streams contained in the requests by some non-OECD countries pursuant to Article 42 of Regulation 2024/1157 on shipments of waste

Pursuant to Article 42 of Regulation 2024/1157, non-OECD countries which intend to receive non-hazardous wastes from the EU after 21 May 2027 need to send a request to indicate their willingness and demonstrate their ability to manage such waste. So far 26 countries or territories have sent such request.

This document provides an overview of the types of waste included in the respective requests by the countries concerned. This information is provided for information only. It does not pre-empt the outcome of the Commission's assessment of these applications in accordance with Regulation (EU) 2024/1157, and especially which countries and which waste types would eventually be included in the list to be established by 21 November 2026 in accordance with Article 41 of that Regulation. The types of waste are presented in the way they are included in the requests, referring to their respective codes, stemming either from the Basel Convention, OECD Decision, the EU List of Waste or HS codes.

The EU has been implementing for many years already the requirements in Article 4A of the Basel Convention, according to which no export of hazardous waste (including those in list A in Annex VIII of the Convention) is allowed to non-OECD countries. The EU moreover prohibits the export of other wastes, including those listed in Annex II of the Convention.

Some of the wastes that are included below are therefore prohibited for export from the EU without exemption in accordance with Article 39 of Regulation (EU) 2024/1157 and will not be considered for inclusion in the list of countries to which the export from the EU is still allowed.

Bangladesh

B1010	Stainless steel, cast iron, other alloy steel, tinned iron or steel, meltable steel scrap
B1010/B1100	Copper, aluminium, zinc, lead, nickel

B3040	Rubber waste
B3080	Rubber waste
B3140	Waste tyres
B2020	Glass waste
B1200	Granulated slags arising from manufacturing iron and steel
B3065	Waste edible fats and oils of animal or vegetable origin (e.g. frying oils), provided they do not exhibit an Annex III characteristic
--	Slaughterhouse waste

El Salvador

B3020	Paper waste

India

B1010	Metal and metal-alloy wastes in metallic, non-dispersible form: • Precious metals (gold, silver, the platinum group, but not mercury) • Iron and steel scrap • Copper scrap • Nickel scrap • Aluminium scrap • Zinc scrap • Tin scrap • Tungsten scrap • Molybdenum scrap • Tantalum scrap - Magnesium scrap • Cobalt scrap • Bismuth scrap • Titanium scrap • Zirconium scrap • Manganese scrap • Germanium scrap • Vanadium scrap • Scrap of hafnium, indium, niobium, rhenium and gallium • Thorium scrap • Rare earths scrap • Chromium scrap
B1100	Metal-bearing wastes arising from melting, smelting and refining of metals: • Hard zinc spelter • Zinc-containing drosses: - Galvanizing slab zinc top dross (>90% Zn) - Galvanizing slab zinc bottom dross (>92% Zn) - Zinc die casting dross (>85% Zn) - Hot dip galvanizers slab zinc dross (batch)(>92% Zn) - Zinc skimmings • Aluminium skimmings (or skims) excluding salt slag • Slags from copper processing for further processing or refining not containing arsenic, lead or cadmium to an extent that they exhibit Annex III hazard characteristics • Wastes of refractory linings, including crucibles, originating from copper smelting • Slags from precious metals processing for further refining •

	Tantalum-bearing tin slags with less than 0.5% tin
B3080/B3040/B3140	Rubber waste, waste tyres
B1020	Clean, uncontaminated metal scrap, including alloys, in bulk finished form (sheet, plate, beams, rods, etc), of: • Antimony scrap • Beryllium scrap • Cadmium scrap • Lead scrap (but excluding lead-acid batteries) • Selenium scrap • Tellurium scrap
A1160	Waste lead-acid batteries
B1090	Waste Li-ion batteries, waste nickel batteries
A1120	- Anode slimes - Waste sludges, excluding anode slimes, from electrolyte purification systems in copper electrorefining and electrowinning operations
B1130	Cleaned spent precious-metal-bearing catalysts
B1150	Precious metals and alloy wastes
A1150	Precious metal ash from incineration of printed circuit boards
B1140	Precious-metal-bearing residues
A1180/A1190/A3180	e-waste, cable waste, PCB or PCT
B1060	Tellurium metallic waste
A2030	Waste catalyst
B3020	Paper waste
A1010	Metal wastes and waste consisting of alloys of any of the following: • Antimony • Arsenic • Beryllium • Cadmium • Lead • Mercury • Selenium • Tellurium • Thallium
A1020	Waste having as constituents or contaminants, excluding metal waste in massive form, any of the following: • Antimony; antimony compounds • Beryllium; beryllium compounds • Cadmium; cadmium compounds • Lead; lead compounds • Selenium; selenium compounds • Tellurium; tellurium compounds
A1100	Dusts and residues from gas cleaning systems of copper smelters
B1030	Refractory metals containing residues
B1050	Mixed non-ferrous metal, heavy fraction scrap,
B1080	Zinc ash and residues including zinc alloys residues
B1180	Waste photographic film containing silver halides and metallic silver
B1190	Waste photographic paper containing silver halides and metallic silver
B1200	Granulated slag arising from the manufacture of iron and steel
B1210	Slag arising from the manufacture of iron and steel including slags as a source of TiO2 and vanadium

B1220	Slag from zinc production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301) mainly for construction
B1230	Mill scaling arising from the manufacture of iron and steel
B1240	Copper oxide mill-scale
B3030	Textile waste
B3035	Waste textile floor coverings, carpets
B3011	Plastic waste
GC010 GC020 B1110	e-waste
GC030	Vessels and other floating structures for breaking up, properly emptied of any cargo and other materials arising from the operation of the vessel which may have been classified as a dangerous substance or waste
GC050	Spent fluid catalyst
B1070	Copper waste
AA010	Dross, scalings and other wastes from the manufacture of iron and steel
GB040	Precious metal and copper slags
B1031	Molybdenum, tungsten, titanium, tantalum, niobium and rhenium metal and metal alloy wastes in metallic dispersible form (metal powder), excluding such wastes as specified in list A under entry A1050, Galvanic sludges
A1050	Galvanic sludges
B1040	Scrap assemblies from electrical power generation not contaminated with lubricating oil, PCB or PCT to an extent to render them hazardous
B1060	Waste selenium and tellurium in metallic elemental form including powder
B1115	Waste metal cables coated or insulated with plastics, not included in list A A1190, excluding those destined for Annex IVA operations or any other disposal operations involving, at any stage, uncontrolled thermal processes, such as open-burning
B1120	Spent catalysts excluding liquids used as catalysts, containing any of Transition metals, excluding waste catalysts (spent catalysts, liquid used catalysts or other catalysts) on list A: Lanthanides (rare earth metals): • Scandium • Vanadium • Manganese • Cobalt • Copper • Yttrium • Niobium • Hafnium • Tungsten • Titanium • Chromium • Iron • Nickel • Zinc • Zirconium • Molybdenum • Tantalum • Rhenium

B1130	Cleaned spent precious-metal-bearing catalysts
B1140	Precious-metal-bearing residues in solid form which contain traces of inorganic cyanides
B1160	Precious-metal ash from the incineration of printed circuit boards
B1170	Precious-metal ash from the incineration of photographic film
B2090	Waste anode butts from steel or aluminium production made of petroleum coke or bitumen and cleaned to normal industry specifications
AA060	Vanadium ashes and residues
AA190	Magnesium waste and scrap that is flammable, pyrophoric or emits, upon contact with water, flammable gases in dangerous quantities
AB120	Inorganic halide compounds, not elsewhere specified or included
AC060	Hydraulic fluids
AC070	Brake fluids
AC080	Antifreeze fluids
AC150	Chlorofluorocarbons
AC160	Halons
AD090	Wastes from production, formulation and use of reprographic and photographic chemicals and materials not elsewhere specified or included
AD100	Wastes from non-cyanide based systems which arise from surface treatment of plastics
AD120	Ion exchange resins
A1030	Wastes having as constituents or contaminants any of the following: • Arsenic; arsenic compounds • Mercury; mercury compounds • Thallium; thallium compounds
A1040	Wastes having as constituents any of the following: • Metal carbonyls • Hexavalent chromium compounds
A1060	Waste liquors from the pickling of metals
A1070	Leaching residues from zinc processing, dust and sludges such as jarosite, hematite, etc.
A1080	Waste zinc residues
A1090	Ashes from the incineration of insulated copper wire
A1110	Spent electrolytic solutions from copper electrorefining and electrowinning operations
A1130	Spent etching solutions containing dissolved copper
A1140	Waste cupric chloride and copper cyanide catalysts
A1170	Unsorted waste batteries excluding mixtures of only list B batteries. Waste batteries not specified on list B containing Annex I

	constituents to an extent to render them hazardous
A1180	Hazardous e-waste
A1190	Waste metal cables coated or insulated with plastics containing or contaminated with coal tar, PCB25, lead, cadmium, other organohalogen compounds or other Annex I constituents to an extent that they exhibit Annex III characteristics.
A2010	Glass waste from cathode-ray tubes and other activated glasses
A2020	Waste inorganic fluorine compounds in the form of liquids or sludges but excluding such wastes specified on list B
A2030	Waste catalysts but excluding such wastes specified on list B
A2040	Waste gypsum arising from chemical industry processes, when containing Annex I constituents to the extent that it exhibits an Annex III hazardous characteristic
A3010	Waste from the production or processing of petroleum coke and bitumen
A3060	Waste nitrocellulose
A3070	Waste phenols, phenol compounds including chlorophenol in the form of liquids or sludges
A3080	Waste ethers not including those specified on list B
A3090	Waste leather dust, ash, sludges and flours when containing hexavalent chromium compounds or biocides
A3100	Waste paring and other waste of leather or of composition leather not suitable for the manufacture of leather articles containing hexavalent chromium compounds or biocides
A3110	Fellmongery wastes containing hexavalent chromium compounds or biocides or infectious substances
A3130	Waste organic phosphorous compounds
A3140	Waste non-halogenated organic solvents but excluding such wastes specified on list B
A3150	Waste halogenated organic solvents
A3160	Waste halogenated or unhalogenated non-aqueous distillation residues arising from organic solvent recovery operations
A3170	Wastes arising from the production of aliphatic halogenated hydrocarbons (such as chloromethane, dichloro-ethane, vinyl chloride, vinylidene chloride, allyl chloride and epichlorhydrin)
A3200	Bituminous material (asphalt waste) from road construction and maintenance, containing tar

A3210	Plastic waste, including mixtures of such waste, containing or contaminated with Annex I constituents, to an extent that it exhibits an Annex III characteristic
A4010	Wastes from the production, preparation and use of pharmaceutical products but excluding such wastes specified on list B
A4040	Wastes from the manufacture, formulation and use of wood preserving chemicals
A4050	Wastes that contain, consist of or are contaminated with any of the following: • Inorganic cyanides, excepting precious-metal-bearing residues in solid form containing traces of inorganic cyanides • Organic cyanides
A4060	Waste oils/water, hydrocarbons/water mixtures, emulsions
A4070	Wastes from the production, formulation and use of inks, dyes, pigments, paints, lacquers, varnish excluding any such waste specified on list B
A2060	Coal-fired power plant fly-ash containing Annex I substances in concentrations sufficient to exhibit Annex III characteristics
A2050	Waste asbestos (dusts and fibres)
A3030	Wastes that contain, consist of or are contaminated with leaded anti-knock compound sludges
A3040	Waste thermal (heat transfer) fluids
A4090	Waste acidic or basic solutions, other than those specified in the corresponding entry on list B
A4150	Waste chemical substances arising from research and development or teaching activities which are not identified and/or are new and whose effects on human health and/or the environment are not known
RB020	Ceramic based fibres of physico-chemical characteristics similar to those of asbestos
AD150	Naturally occurring organic material used as a filter medium (such as bio-filters)
AC170	Treated cork and wood wastes
B4030	Used single-cameras (e-waste)
B4020	Wastes from production, formulation and use of resins, latex, plasticizers, glues/adhesives, not listed on list A, free of solvents and other contaminants to an extent that they do not exhibit Annex III characteristics, e.g., water-based, or glues based on casein starch, dextrin, cellulose ethers, polyvinyl alcohols

B4010	Wastes consisting mainly of water-based/latex paints, inks and hardened varnishes not containing organic solvents, heavy metals or biocides to an extent to render them hazardous
B3120	Wastes consisting of food dyes
B3110	Fellmongery wastes not containing hexavalent chromium compounds or biocides or infectious substances
B3100	Leather dust, ash, sludges or flours not containing hexavalent chromium compounds or biocides
B3090	Paring and other wastes of leather or of composition leather not suitable for the manufacture of leather articles, excluding leather sludges, not containing hexavalent chromium compounds and biocides
B3060	Wastes arising from agro-food industries provided it is not infectious: • Wine lees • Dried and sterilized vegetable waste, residues and byproducts, whether or not in the form of pellets, of a kind used in animal feeding, not elsewhere specified or included • Degras: residues resulting from the treatment of fatty substances or animal or vegetable waxes • Waste of bones and horn-cores, unworked, defatted, simply prepared (but not cut to shape), treated with acid or degelatinised • Fish waste • Cocoa shells, husks, skins and other cocoa waste • Other wastes from the agro-food industry excluding by-products which meet national and international requirements and standards for human or animal consumption
B3050	Untreated cork and wood waste: • Wood waste and scrap, whether or not agglomerated in logs, briquettes, pellets or similar forms • Cork waste: crushed, granulated or ground cork
B2070	Calcium fluoride sludge
B2080	Waste gypsum arising from chemical industry processes not included on list A
B2100	Waste hydrates of aluminium and waste alumina and residues from alumina production excluding such materials used for gas cleaning, flocculation or filtration processes
B2110	Bauxite residue (“red mud”) (pH moderated to less than 11.5)
B2120	Waste acidic or basic solutions with a pH greater than 2 and less than 11.5, which are not corrosive or otherwise hazardous

BEU04	Composite packaging consisting of mainly paper and some plastic, not containing residues and not covered by Basel entry B3020
BEU05	Clean biodegradable waste from agriculture, horticulture, forestry, gardens, parks and cemeteries
B3026	The following waste from the pre-treatment of composite packaging for liquids, not containing Annex I materials in concentrations sufficient to exhibit Annex III characteristics: • Non-separable plastic fraction • Non-separable plastic-aluminium fraction
B3027	Self-adhesive label laminate waste containing raw materials used in label material production
B3030	Textile waste
B3040	Rubber waste
B3050	Untreated cork and wood waste: • Wood waste and scrap, whether or not agglomerated in logs, briquettes, pellets or similar forms • Cork waste: crushed, granulated or ground cork
B3130	
AB150	Unrefined calcium sulphite and calcium sulphate from flue gas desulphurisation (FGD)
GE020	Glass Fibre Waste
GF010	Ceramic wastes which have been fired after shaping, including ceramic vessels (before and/or after use)
GG030	Bottom ash and slag tap from coal fired power plants
GG040	Coal fired power plants fly ash
GN010	Waste of pigs', hogs' or boars' bristles and hair or of badger hair and other brush-making hair
GN020	Horsehair waste, whether or not put up as a layer with or without supporting material
GN030	Waste of skins and other parts of birds, with their feathers or down, of feathers and parts of feathers (whether or not with trimmed edges) and down, not further worked than cleaned, disinfected or treated for preservation
B2010	Wastes from mining operations in non-dispersible form: • Natural graphite waste • Slate waste, whether or not roughly trimmed or merely cut, by sawing or otherwise • Mica waste • Leucite, nepheline and nepheline syenite waste • Feldspar waste • Fluorspar waste • Silica wastes in solid form excluding those used in foundry operations
Y47	Residues arising from the incineration of household wastes
B2050	Coal-fired power plant fly-ash, not included on list A

B2060	Spent activated carbon not containing any Annex I constituents to the extent they exhibit Annex III characteristics, for example, carbon resulting from the treatment of potable water and processes of the food industry and vitamin production
A4110	Wastes that contain, consist of or are contaminated with any of the following: • Any congenor of polychlorinated dibenzo-furan • Any congenor of polychlorinated dibenzo-p-dioxin
A4140	Waste consisting of or containing off specification or outdated30 chemicals corresponding to Annex I categories and exhibiting Annex III hazard characteristics
A4160	Spent activated carbon not included on list B
A4130	Waste packages and containers containing Annex I substances in concentrations sufficient to exhibit Annex III hazard characteristics
Y46	Wastes collected from households
A4120	Wastes that contain, consist of or are contaminated with peroxides
A4080	Wastes of an explosive nature
A4020	Clinical and related wastes; that is wastes arising from medical, nursing, dental, veterinary, or similar practices, and wastes generated in hospitals or other facilities during the investigation or treatment of patients, or research projects
A4030	Wastes from the production, formulation and use of biocides and phytopharmaceuticals, including waste pesticides and herbicides which are off-specification, outdated, or unfit for their originally intended use
A3190	Waste tarry residues (excluding asphalt cements) arising from refining, distillation and any pyrolitic treatment of organic materials
A3120	Fluff - light fraction from shredding
A3020	Waste mineral oils unfit for their originally intended use
A3050	Wastes from production, formulation and use of resins, latex, plasticizers, glues/adhesives excluding such wastes specified on list B
B3010	Plastic waste
B2020	Glass waste in non-dispersible form: • Cullet and other waste and scrap of glass except for glass from cathode-ray tubes and other activated glasses
A4100	Wastes from industrial pollution control devices for cleaning of industrial off-gases but excluding such wastes specified on list B

B2030	Ceramic wastes in non-dispersible form: • Cermet wastes and scrap (metal ceramic composites) • Ceramic based fibres not elsewhere specified or included
B2040	Other wastes containing principally inorganic constituents: • Partially refined calcium sulphate produced from flue-gas desulphurization (FGD) • Waste gypsum wallboard or plasterboard arising from the demolition of buildings • Slag from copper production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301 and DIN 8201) mainly for construction and abrasive applications • Sulphur in solid form • Limestone from the production of calcium cyanamide (having a pH less than 9) • Sodium, potassium, calcium chlorides • Carborundum (silicon carbide) • Broken concrete • Lithium-tantalum and lithium-niobium containing glass scraps
B3070	The following wastes: • Waste of human hair • Waste straw • Deactivated fungus mycelium from penicillin production to be used as animal feed
B1250	Waste end-of-life motor vehicles, containing neither liquids nor other hazardous components
B3065	Waste edible fats and oils of animal or vegetable origin (e.g. frying oils), provided they do not exhibit an Annex III characteristic
B2130	Bituminous material (asphalt waste) from road construction and maintenance, not containing tar
Mixtures B1010 and B1070	Metal waste
Mixtures of GB040 and B1100	Metal waste
Mixtures of GB040 and B1070 and B1100	Metal waste
Mixtures B1010	Metal waste
Mixtures B2010	Wastes from mining operations in non-dispersible form: • Natural graphite waste • Slate waste, whether or not roughly trimmed or merely cut, by sawing or otherwise • Mica waste

	• Leucite, nepheline and nepheline syenite waste • Feldspar waste • Fluorspar waste • Silica wastes in solid form excluding those used in foundry operations
Mixtures B2030	Ceramic wastes in non-dispersible form: • Cermet wastes and scrap (metal ceramic composites) • Ceramic based fibres not elsewhere specified or included
Mixtures B3020	Paper waste
Mixtures B3030	Textile waste
Mixtures B3040	Rubber waste
Mixtures B3050	Wood waste

Indonesia

4707.10.00	Paper or unrolled cardboard kraft papers or paper or wavy cardboard
4707.20.00	Paper or another carton paper is made from unroll pulp chemical, not full colored
4707.30.00	Paper or cardboard paper made from mechanical pulp (for example, newspapers, journals, and smililar printed materials)
4707.90.00	Others, waste and scraps are not sorted included; This group covers all types paper or restored cardboard paper (waste and scrap) other than in HS 4707.10.00, HS 4707.20.00, and HS 4707.30.00, unsorted included.

B1120	Spent catalyst
B2020	Glass waste in non-dispersible form: • Cullet and other waste and scrap of glass except for glass from cathode-ray tubes and other activated glasses
B2040	Other wastes containing principally inorganic constituents: • Partially refined calcium sulphate produced from flue-gas desulphurization (FGD) • Waste gypsum wallboard or plasterboard arising from the demolition of buildings • Slag from copper production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301 and DIN 8201) mainly for construction and abrasive applications • Sulphur in solid form • Limestone from the production of calcium cyanamide (having a pH less than 9) • Sodium, potassium, calcium chlorides • Carborundum (silicon carbide) • Broken concrete • Lithium-tantalum and lithium-niobium containing glass scraps
B2050	Coal-fired power plant fly-ash, not included on list A
B2060	Spent activated carbon not containing any Annex I constituents to the extent they exhibit Annex III characteristics, for example, carbon resulting from the treatment of potable water and processes of the food industry and vitamin production
B2090	Waste anode butts from steel or aluminium production made of petroleum coke or bitumen and cleaned to normal industry specifications
B2110	Bauxite residue (“red mud”) (pH moderated to less than 11.5)
B3010	Plastic waste
B3040	Rubber waste
B3060	Wastes arising from agro-food industries provided it is not infectious
B3065	Waste edible fats and oils of animal or vegetable origin (e.g. frying oils), provided they do not exhibit an Annex III characteristic

Pakistan

B3040 B3080	Rubber waste
B3090	Lining material, leather

B3100	Leather dust, ash, sludges or flours Bovine leather pieces
B3050	Wreck wood relics Wood in chips or particles; Non-coniferous Scobies chips, corn cob CW-CWOD Bulk for Reckit Benkisier Scobies quattro wooden dust-free bedding Sample for cork pieces brown colour Grounded granulated cork Sanacil Bamboo
B3020	Paper waste
B3030 B3035	Textile waste Textile floor coverings
B2030	Spare parts for machines of the ceramic industry
B2020	Broken glass waste
B1010; B1030; B1031; B1040; B1050; B1060; B1070; B1080; B1090; B1100; B1115; B1120; B1130; B1140; B1150; B1160; B1170; B1180; B1190; B1200; B1210; B1220; B1230; B1240; B1250	Auto-parts scrap Mixed broken house hold items; cast iron Utensils remeltable scrap, sanitary, steel Fence Iron and steel remeltable press bundle Iron and steel remeltable shredded scrap Iron and steel rerollable scrap Iron and steel auto parts scrap Iron and steel Compressor scrap Iron and steel re-meltable scrap Brass scrap Copper cable cutting scrap Aluminum scrap Aluminum cable scrap Lead waste with impurities Waste metal cables coated or insulated with plastics Spent catalysts and Transition metals Precious-metal-bearing residues in solid form Waste end-of-life motor vehicles, Copper oxide mill-scale

	Mill scaling arising from the manufacture of iron and steel
	Slag from zinc production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301) mainly for construction
	Granulated slag arising from the manufacture of iron and steel
	Waste photographic film and paper containing silver halides and metallic silver
	Precious-metal ash from the incineration of printed circuit boards and photographic film
	Precious metals and alloy wastes (gold, silver, the platinum group, but not mercury) in a dispersible, non-liquid form with appropriate packaging and labelling
	Cleaned spent precious-metal-bearing catalysts
	Waste of copper and copper alloys in dispersible form
	Metal-bearing wastes arising from melting, smelting and refining of metals
	Zinc ash and residues including zinc alloys residues in dispersible form
	Waste batteries
	Compact drive MC Cheese head screw
	Tungsten rods for Argon welding
	Tungsten steel ionizer wire
	Tungsten electrode
	Molybdenum plates
	Magnesium turnings
	Gear box housing
	Cobalt powder
	Cobalt based rod
	Titanium foil
	Manganese chips
	Chromium powder

	Hydraulic cylinder Niobium powder Refractory metals containing residues Molybdenum, tungsten, titanium, tantalum, niobium and rhenium metal and metal alloy wastes in metallic dispersible form (metal powder) Scrap assemblies from electrical power generation Mixed non-ferrous metal, heavy fraction scrap Waste selenium and tellurium in metallic elemental form including powder Indium foil
B1010/GC020	e-waste
B1020	Clean, uncontaminated metal scrap, including alloys, in bulk finished form (sheet, plate, beams, rods, etc); Spare parts for radiation protection
B2010	Scrap assemblies from electrical power generation not contaminated with oil, PCB or PCT
B2080; B2070; B2060; B2050; B2040; B2090; B2100; B2110; B2130; B2120	Waste gypsum arising from chemical industry processes Calcium fluoride sludge Spent activated carbon Coal-fired power plant fly-ash Wastes containing principally inorganic constituents; Carbide rods Waste anode butts from steel or aluminium production made of petroleum coke or bitumen and cleaned to normal industry specifications Waste hydrates of aluminium and waste alumina and residues from alumina production Bauxite residue Bituminous material Non-corrosive waste acidic or basic solutions

GC020	SMA limiter (e waste) Supressor, line filter Electronic circuit board
B3140	Waste tyres

Philippines

4707.10.00	- Unbleached kraft paper or paperboard or corrugated paper or paperboard - New Double-Lined Kraft (if recovered unbleached kraft paper)
4707.20.00	Other paper or paperboard made mainly of bleached chemical pulp, not coloured in the mass
4707.30.00	- Paper or paperboard made mainly of bleached mechanical pulp (for example, newspapers, journals and similar printed matter) - Recovered Paper Deink News - Recovered Paper White Ledger
4707.90.00	- Other, including unsorted waste and scrap - Mixed Recovered Paper - Recovered Paper White Ledger

Saudi Arabia

B1010; B1050; B1070	Metal waste
B1100; B1200; B1210; B1220; B1230; B1240; B2040; B2050	Metal waste Mill scaling arising from the manufacture of iron and steel Other wastes containing principally inorganic constituents: • Partially refined calcium sulphate produced from flue-gas desulphurization (FGD) • Waste gypsum wallboard or plasterboard arising from the demolition of buildings • Slag from copper production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301 and DIN 8201) mainly for construction and abrasive applications • Sulphur in solid form • Limestone from the production of calcium cyanamide (having a pH less than 9) • Sodium, potassium, calcium chlorides • Carborundum (silicon carbide) • Broken concrete • Lithium-tantalum and lithium-niobium containing glass scraps

	Coal-fired power plant fly-ash, not included on list A
B3010	Plastic waste
B3020	Paper waste
B2020	Glass waste in non-dispersible form: • Cullet and other waste and scrap of glass except for glass from cathode-ray tubes and other activated glasses
B3040	Rubber waste
B3030	Textile waste
B3060	Wastes arising from agro-food industries provided it is not infectious
B3065	Waste edible fats and oils of animal or vegetable origin (e.g. frying oils), provided they do not exhibit an Annex III characteristic
B3050	Untreated cork and wood waste: • Wood waste and scrap, whether or not agglomerated in logs, briquettes, pellets or similar forms • Cork waste: crushed, granulated or ground cork

Serbia

B1010	Metal waste: Copper, aluminium, iron and steel
B1020	Lead scrap, excluding lead acid batteries
B1230	Mill scaling arising from the manufacture of iron and steel
B3020	Paper waste
B3140	Waste tyres

Singapore

B1090	Waste batteries

Sri Lanka

B1010	Metal & metal-alloy wastes in metallic, non-dispersible form
B1020	Clean, uncontaminated metal scrap. including alloys, in bulk finished form (sheet, plate, beams, rods, etc.)
B1030	Refractory metals containing residues
B1031	Molybdenum, tungsten, titanium, tantalum, niobium and rhenium metal and metal alloy wastes in metallic dispersible form (metal powder), excluding such wastes as specified in list A under entry A1050, Galvanic sludges

B1040	Scrap assemblies from electrical power generation not contaminated with oil, PCB or PCT
B1050	Mixed non-ferrous metal, heavy fraction
B1060	Waste Selenium & Tellurium in metallic elemental form including powder
B1070	Copper and copper alloy waste
B1080	Zinc ashes and residues
B1090	Waste batteries
B1100	Metal bearing waste
B1115	Waste cables
B1120	Spent catalyst
B1130	Cleaned spent precious-metal bearing catalysts
B1140	Precious - metal-bearing residues in solid form which contain traces of inorganic cyanides
B1150	Precious metals and alloy wastes
B1160	Precious-metal ash from the incineration of printed circuit boards
B1170	Precious-metal ash from the incineration of photographic film
B1180	Waste photographic film containing silver halides and metallic silver
B1190	Waste photographic paper containing silver halides and metallic silver
B1200	Granulated slag from iron and steel production
B1210	Slag arising from the manufacture of iron and steel including slags as a source of TiO2 and vanadium
B1220	Slag from zinc production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301) mainly for construction
B1230	Mill scaling arising from the manufacture of iron and steel
B1240	Copper oxide mill-scale
B1250	Waste end-of-life motor vehicles, containing neither liquids nor other hazardous components
B2010	Wastes from mining operations in non-dispersible form: • Natural graphite waste • Slate waste, whether or not roughly trimmed or merely cut, by sawing or otherwise • Mica waste • Leucite, nepheline and nepheline syenite waste • Feldspar waste • Fluorspar waste • Silica wastes in solid form excluding those used in foundry operations
B2020	Glass waste in non-dispersible form: • Cullet and other waste and scrap of glass except for glass from cathode-ray tubes and other activated glasses

B2030	Ceramic wastes in non-dispersible form: • Cermet wastes and scrap (metal ceramic composites) • Ceramic based fibres not elsewhere specified or included
B2040	Other wastes containing principally inorganic constituents: • Partially refined calcium sulphate produced from flue-gas desulphurization (FGD) • Waste gypsum wallboard or plasterboard arising from the demolition of buildings • Slag from copper production, chemically stabilized, having a high iron content (above 20%) and processed according to industrial specifications (e.g., DIN 4301 and DIN 8201) mainly for construction and abrasive applications • Sulphur in solid form • Limestone from the production of calcium cyanamide (having a pH less than 9) • Sodium, potassium, calcium chlorides • Carborundum (silicon carbide) • Broken concrete • Lithium-tantalum and lithium-niobium containing glass scraps
B2050	Coal-fired power plant fly-ash, not included on list A
B2060	Spent activated carbon not containing any Annex I constituents to the extent they exhibit Annex III characteristics, for example, carbon resulting from the treatment of potable water and processes of the food industry and vitamin production
B2070	Calcium fluoride sludge
B2080	Waste gypsum arising from chemical industry processes not included on list A
B2090	Waste anode butts from steel or aluminium production made of petroleum coke or bitumen and cleaned to normal industry specifications
B2100	Waste hydrates of aluminium and waste alumina and residues from alumina production excluding such materials used for gas cleaning, flocculation or filtration processes
B2110	Bauxite residue (“red mud”) (pH moderated to less than 11.5)
B2120	Waste acidic or basic solutions with a pH greater than 2 and less than 11.5, which are not corrosive or otherwise hazardous
B2130	Bituminous material (asphalt waste) from road construction and maintenance, not containing tar
B3010	Plastic waste
B3011	Plastic waste
B3020	Paper waste

B3026	The following waste from the pre-treatment of composite packaging for liquids, not containing Annex I materials in concentrations sufficient to exhibit Annex III characteristics: • Non-separable plastic fraction • Non-separable plastic-aluminium fraction
B3027	Self-adhesive label laminate waste containing raw materials used in label material production
B3030	Textile waste
B3035	Textile floor coverings
B3040	Rubber waste
B3050	Untreated cork and wood waste: • Wood waste and scrap, whether or not agglomerated in logs, briquettes, pellets or similar forms • Cork waste: crushed, granulated or ground cork
B3060	Wastes arising from agro-food industries provided it is not infectious
B3065	Waste edible fats and oils of animal or vegetable origin (e.g. frying oils), provided they do not exhibit an Annex III characteristic
B3070	The following wastes: • Waste of human hair • Waste straw • Deactivated fungus mycelium from penicillin production to be used as animal feed
B3080	Rubber waste
B3090	Paring and other wastes of leather or of composition leather not suitable for the manufacture of leather articles, excluding leather sludges, not containing hexavalent chromium compounds and biocides
B3100	Leather dust, ash, sludges or flours not containing hexavalent chromium compounds or biocides
B3110	Fellmongery wastes not containing hexavalent chromium compounds or biocides or infectious substances
B3120	Wastes consisting of food dyes
B3130	Waste polymer ethers and waste non-hazardous monomer ethers incapable of forming peroxides
B3140	Waste tyres
B4010	Wastes consisting mainly of water-based/latex paints, inks and hardened varnishes not containing organic solvents, heavy metals or biocides to an extent to render them hazardous
B4020	Wastes from production, formulation and use of resins, latex, plasticizers, glues/adhesives, not listed on list A, free of solvents and other contaminants to an extent that they do not exhibit Annex III characteristics, e.g., water-

	based, or glues based on casein starch, dextrin, cellulose ethers, polyvinyl alcohols

Taiwan[1]

B3011	Plastic waste
B3020	Paper waste
B1010	Waste steel
B1030	Refractory metals containing residues
B1031	Molybdenum, tungsten, titanium, tantalum, niobium and rhenium metal and metal alloy wastes in metallic dispersible form (metal powder), excluding such wastes as specified in list A under entry A1050, Galvanic sludges
B1150	Precious metals and alloy wastes
B1080	Zinc ashes and residues
B1100	Metal bearing waste
B1120	Spent catalyst
B1130	Cleaned spent precious metal bearing catalyst
GC050	Spent fluid catalytic cracking (FCC) catalysts
GC010	Electrical assemblies
B3030	Textile waste
B1115	Waste cables
B1200	Granulated slag arsing from iron and steel production

Thailand

B1010	Metal waste
B1050	Mixed non-ferrous scrap
B1040	Scrap assemblies from electrical power generation not contaminated with oil, PCB or PCT
B3020	Paper waste
B3040	Rubber waste
B1250	Waste end-of-life motor vehicles, containing neither liquids nor other hazardous components
B1120	Spent catalyst

Togo

EU3011/B3011/Y48	Plastic waste – PVC – PE – PP
BEU04/B3020	Paper waste
B1010	Metal waste: aluminium, copper, iron and steel

Tunisia

B1010	Metal waste
B1020	Metal waste
B1100	Metal bearing waste
B1130	Spent precious metal bearing waste
